Professional Summary

Dedicated and passionate tech enthusiast committed to continuous exploration and innovation in software development. Striving to optimize processes and productivity through proactive learning.

Education

B.Tech in Information Technology,
VNR Vignana Jyothi Institute of Engineering & Technology

2020 – 2023

Professional Experience

Software Engineer, Audree Infotech

Sep 2023 – Present

- Gained hands-on experience with Angular, C#, .NET Framework, Dapper ORM, and Azure DevOps, IIS Web Server
- Enhanced application performance by developing common implementations and optimizing procedures
- Developed projects based on new requirements, ensuring alignment with client needs and industry standards

Internship, Audree Infotech

June 2023 – Sep 2023

- Learned and practiced development using C#, ASP.NET, MVC and .NET Framework
- Developed hands-on projects and practice exercises to apply knowledge in real-world scenarios
- Gained experience with database management using SQL and ORM tools like Entity Framework

Internship, Score Kitty

Dec 2021 – Feb 2022

- Designed a dynamic frontend to enhance the user interface (UI) and user experience (UX)
- Learned and utilized WordPress and Elementor for website development and customization
- Ensured mobile responsiveness and cross-platform compatibility of web applications

Projects

Batch Record Management System

- Led development of a pharmaceutical batch management system with automated DOCX/PDF workflows, quality checks and multi-level approval.
- Integrated Angular DataTables with server-side pagination to retrieve lakhs of records in seconds.
- Developed a C# VSTO Word Add-in with dynamic ribbon UI for credential entry, data-binding and animated loading.
- Added dynamic timestamp and user metadata in PDF headers/footers using `iTextSharp.text.pdf`.
- Implemented role-based track-changes control, disabling save/review buttons based on document context.
- : Angular, Bootstrap, .NET Core, Dapper ORM, VSTO, Open XML SDK, iTextSharp, SQL Server, Azure DevOps.

YouTube Playlist Curator

- Developed a tool for efficient YouTube playlist management, including bulk video deletion.
- Integrated Google OAuth2 for secure Gmail login and playlist access.
- Utilized YouTube Data API to fetch playlists and manage videos with a user-friendly interface.
- Technologies: Angular, Google Cloud Console, YouTube Data API, OAuth2.

Process Work Order (PWO)

- Developed an online system for reporting equipment problems in the engineering department
- Built back-end using .NET for the API and front-end with Angular framework
- Implemented CRUD operations, bulk uploads, and bug resolution
- Technologies: .NET Framework, Angular, Bootstrap, SQL server, Azure Devops, Entity Framework, DDD architecture, IIS

Portfolio Website

- Developed a personal portfolio website showcasing projects, skills, and personal information.
- Added a contact feature allowing users to send messages directly to my work Gmail via Email.js.
- Implemented visitor tracking by generating unique identifiers for users, storing them in a database, and tracking revisit counts.
- Technologies: Angular, Firebase RealTime Database, Email.js, FontAwesome, Bootstrap.

Smart ID Card Generation

- Built a website for viewing student ID card details by scanning a QR code.
- Simplified user detail retrieval through compact and efficient QR codes.
- Technologies: Angular, Python.

Skills

Languages: HTML, CSS, JavaScript, Java, C#, SQL

Frameworks & Technologies: Angular, ASP.NET Core, ASP.NET MVC, Entity Framework, Dapper Framework, Bootstrap, VSTO.

Tools: VS Code, Visual Studio, GitHub, Notion, Microsoft PowerToys, AWS, Azure DevOps.

Specialized Courses

Google-Certified UX Design Fundamentals Course on Coursera (Oct 2022) (Certificate)

Oxford Achiever English Proficiency (Certificate)

Strengths

Dedication, Leadership, Observational Skills, Positive Thinking, Prioritization
